

Full-stack developer in Berlin, building software since 2023 with **TypeScript, React, Node.js and React Native**. Designed and built **Ambulancias GoRuiz** as a personal project: a multi-tenant platform for ambulance operations with a web panel, an Expo mobile app and a tested Node.js/MongoDB API. Professional background in Emergency Medical Services (EMS). Looking for a full-time developer role — remote, hybrid or on-site in the EU.

SKILLS

- Languages & frameworks
- TypeScript · JavaScript · React · React Native · Expo · Node.js · Express · HTML · CSS · Tailwind CSS
- Data & APIs
- MongoDB / Mongoose · REST · WebSocket · OpenAPI · Zod
- Security
- JWT · role-based access · TOTP MFA · multi-tenant isolation
- Testing & delivery
- Jest · Supertest · Vitest · Testing Library · GitHub Actions · Gitleaks · Git
- Workflow
- AI-assisted tools (Cursor, Claude, Codex) — every change reviewed

LANGUAGES

Spanish	Native
English	Fluent
German	B1–B2

EDUCATION

Full-Stack Web Development	2023
CareerFoundry · Berlin	
Emergency Medical Services (EMS)	2015–2017
Natanael Formación · Murcia, Spain	

EARLIER EXPERIENCE

- Driving instructor (self-employed & schools) · UK / Spain · 2008–2015
- Restaurant manager · Leeds, UK · 2013–2015

SELECTED PROJECT

Ambulancias GoRuiz

2025 – 2026 · Personal project

Sole developer · Multi-tenant platform for ambulance companies · archived before production

- Designed and built a web panel (**React 19, Vite, Tailwind**) for admins and superadmin, including worker views, and an **Expo / React Native** app for field crews — shift planning, workday and trips, absences, documents, payslips and bonuses.
- Built a **Node.js / Express / TypeScript** API on MongoDB: tenant isolation enforced in the service layer, JWT with token versioning, role-based access, **TOTP MFA and step-up** re-authentication, authenticated file access and WebSocket refresh events.
- 893 backend tests** (integration tests on a real MongoDB) and **432 frontend tests**; CI with a tenant-isolation suite, smoke test and Gitleaks secret scanning; OpenAPI 3 spec with 95 operations.
- Reached an advanced functional stage; deliberately archived before production deployment, with a recovery guide and documented technical debt.

PROFESSIONAL EXPERIENCE

Rettungssanitäter · Emergency Medical Services (EMS)

2017 – present

Ambulance services · Berlin, Germany & Murcia, Spain

- Patient assessment, emergency care and transport under time pressure; clear communication with hospital teams and non-clinical staff.
- Work to protocols in high-stakes situations and hand over cases clearly — habits I bring to incident handling and code review.
- Day-to-day knowledge of ambulance operations (rosters, crews, vehicles, documentation) that shaped the GoRuiz domain model.

ADDITIONAL DEVELOPMENT WORK

Product Manager

2024 · Learning project

React · TypeScript · Express · Sequelize · github.com/Brocal82

- Full-stack CRUD app: typed React SPA with React Router and Tailwind CSS, and a Node/Express REST API with Sequelize.

CareerFoundry projects (2023) and other code samples on GitHub.
